

## The joy of control—and cooking

# Getting genius in the kitchen

While it has always been called the “heart of the home,” today’s kitchen can be equal parts brain with Control4® and Sub-Zero/Wolf. From world-class appliances to easy-to-use apps that make food prep easier than ever, a smart kitchen brings even more joy to cooking—and a lot more control to life at home. In fact, we bet you’ll wonder how you ever entertained without it.

Get a text when the refrigerator door is left open. Be alerted the minute your roast reaches optimal temperature. Increase ice production for a party in one touch. Keep food fresh while you’re away with a pre-set that automatically manages energy without compromising a single berry or broccolini. And remember, your recipe for just the right amount of control may vary from day to day...

# The joy of control in your kitchen

What's cooking in a smart kitchen depends entirely on what kind of intelligence you'd like to serve. Here are just a few examples, and remember, smart kitchens can be as creative as their cooks.

- 1 Automate your shades to close as the sun sets. Open as the sun rises.
- 2 Program one-touch buttons for optimal lighting: one for "Cooking Prep," another for "Entertaining."
- 3 Send appliance maintenance and service requests through the Control4® system.
- 4 Set lights to flash in other rooms when the oven preheat is complete.
- 5 Send a notification to the living room TV when the roast has reached optimal temperature.
- 6 Program the ice-maker to increase ice production just in time for the party to commence.
- 7 Request alerts that report your energy usage.
- 8 From a touch screen, queue up the perfect playlist as your guests sit down in the dining room.

## Brains built-in

Convenience, energy savings and the perfect meal every time. A Control4® smart kitchen is designed around the Sub-Zero Built-In Series refrigerators and the Wolf E-Series Ovens.

### Sub-Zero Built-In Refrigeration

- Works seamlessly with the Control4 system
- Provide real time information regarding door status, temperature, Smart Grid and more
- Convenience features for your lifestyle
- Enhanced performance for parties, vacations, and time of day
- When connected with a system that can communicate with external parties, the Smart Refrigerator can provide error code information prior to the service visit to ensure that the Service Tech is informed before they even enter the home to ensure you have the best service experience possible

No more ruined roasts! Sub-Zero and Wolf apps keep you connected to the kitchen no matter where you are in the house.

#### Wolf E-Series Ovens

- Works seamlessly with the Control4 system
- Check on the preheat status, timer, and temperature probe from anywhere in the home
- Entertain without spending your evening in the kitchen
- Receive service alerts if something goes wrong with your oven, and send that information to your service provider
- Choose to be alerted of high energy use in your area, informing you to refrain from using the oven for a short time

## Find a dealer near you

A smart kitchen just keeps getting smarter with every new idea you have. Simply find a Control4® dealer in your area and schedule time to discuss your ideas about control. Together you'll come up with the perfect recipe for success in the kitchen and all throughout your house.
